

cover It up! BUNDLE

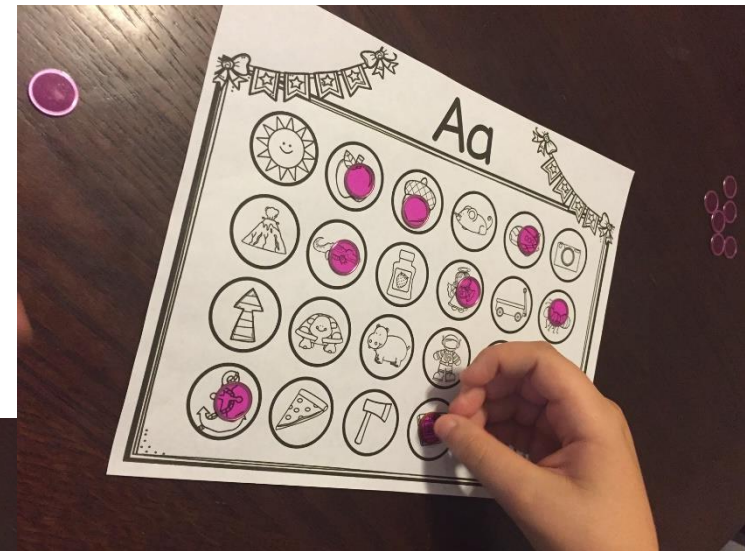

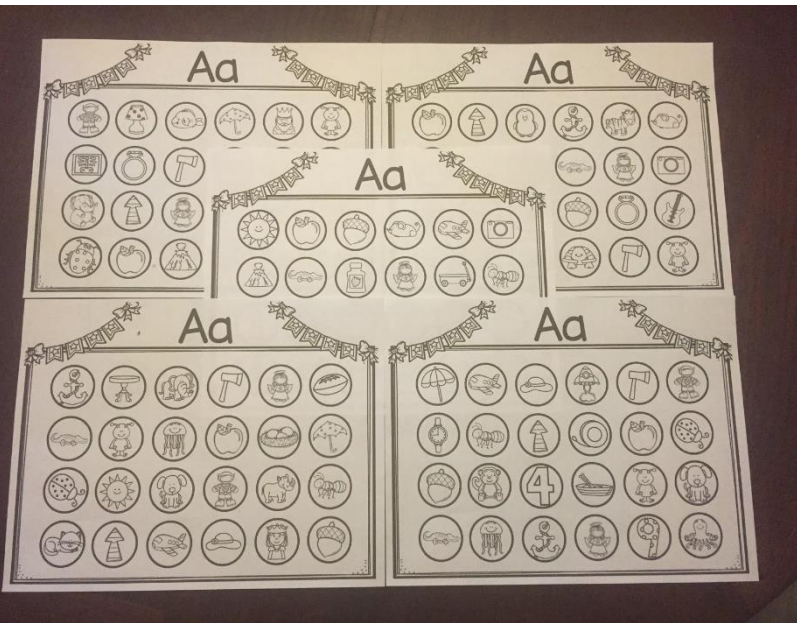

Created by: Julie Davis

How to Use It

I like to use these as a warm-up to my Guided Reading Group. I have the sheets already laying on the table at each student's seat. When the students come to the table they immediately begin working on the sheet while I am getting the rest of the class ready for their literacy centers and on task.

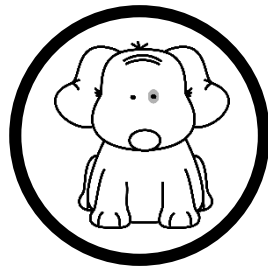

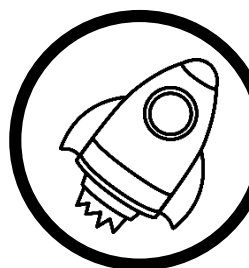

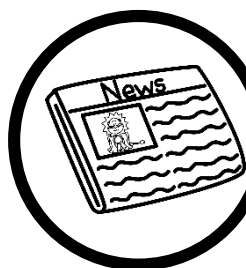

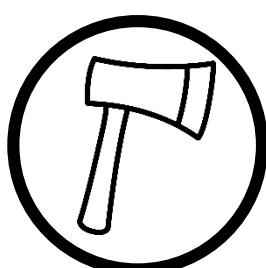

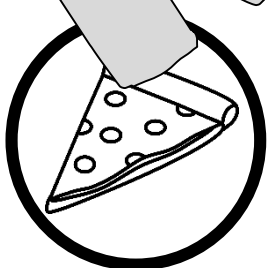

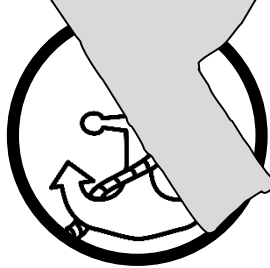

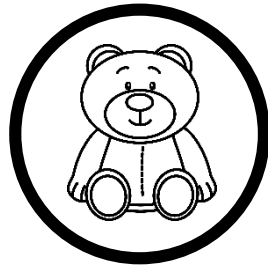

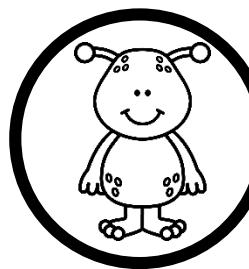

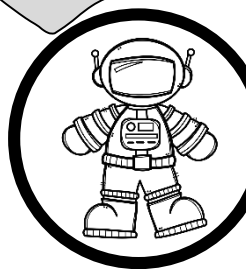

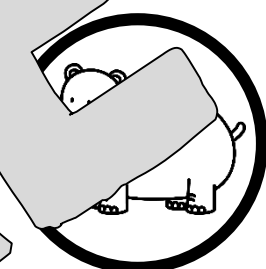

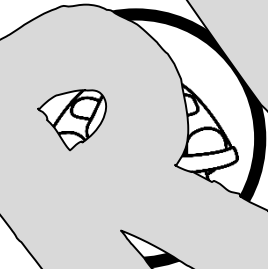

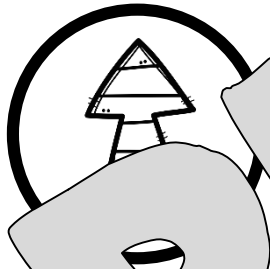

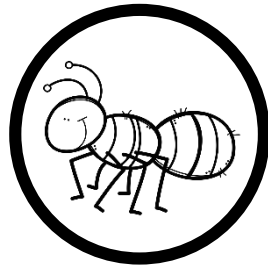

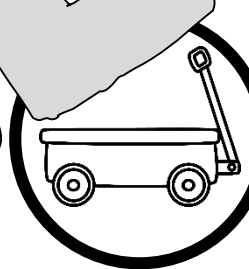

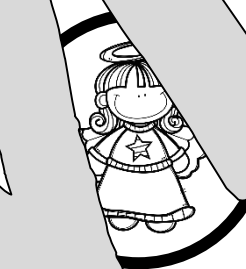

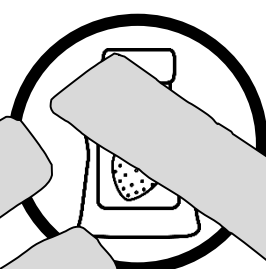

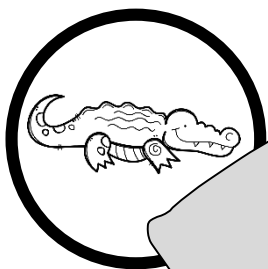

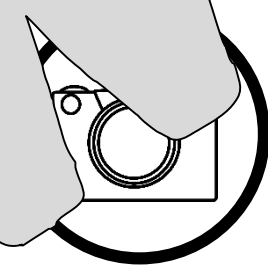

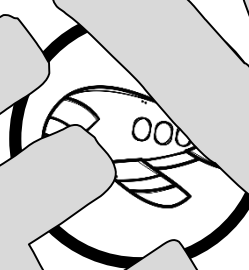

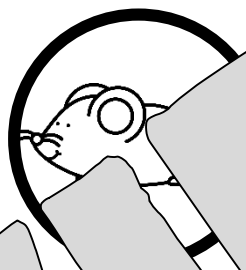

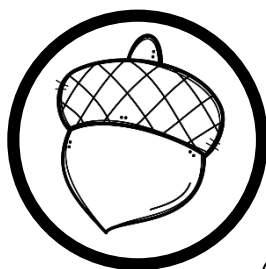

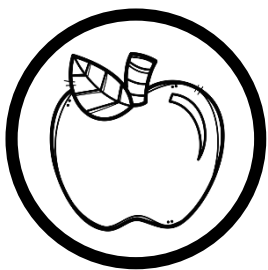

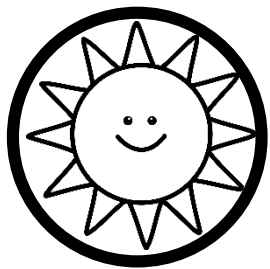

This helps with less disruptions at my table and less wasted time.

There are 5 different sheets for each skill so that each student at the group is able to have a different sheet to complete.

These can be used with bingo daubers or they can be reused over and over by having the students place tokens on each circle.
