# Instructions

## Sound Identification

Students will read the code on the side of the mat. Using the color code, determine the letter sound represented by each color and place the matching snap cubes on the correct picture to show the beginning sound on the mat.

# Instructions

## Number Identification

Students will read the code on the side of the mat. Using the color code, determine the number represented by each color and place the matching snap cubes on the correct number on the mat.

# Instructions

## Subitizing Identification

Students will read the code on the side of the mat. Using the color code, determine the number represented by each color and place the matching snap cubes on the correct dot pattern on the mat.
