Created by

4 sets of 10 different designs each!

Instructions

Letter Identification

Students will read the code on the side of the mat. Using the color code, determine the letter represented by each color and place the matching snap cubes on the correct letter on the mat.

Instructions

Sound Identification

Students will read the code on the side of the mat. Using the color code, determine the letter sound represented by each color and place the matching snap cubes on the correct picture to show the beginning sound on the mat.

Instructions

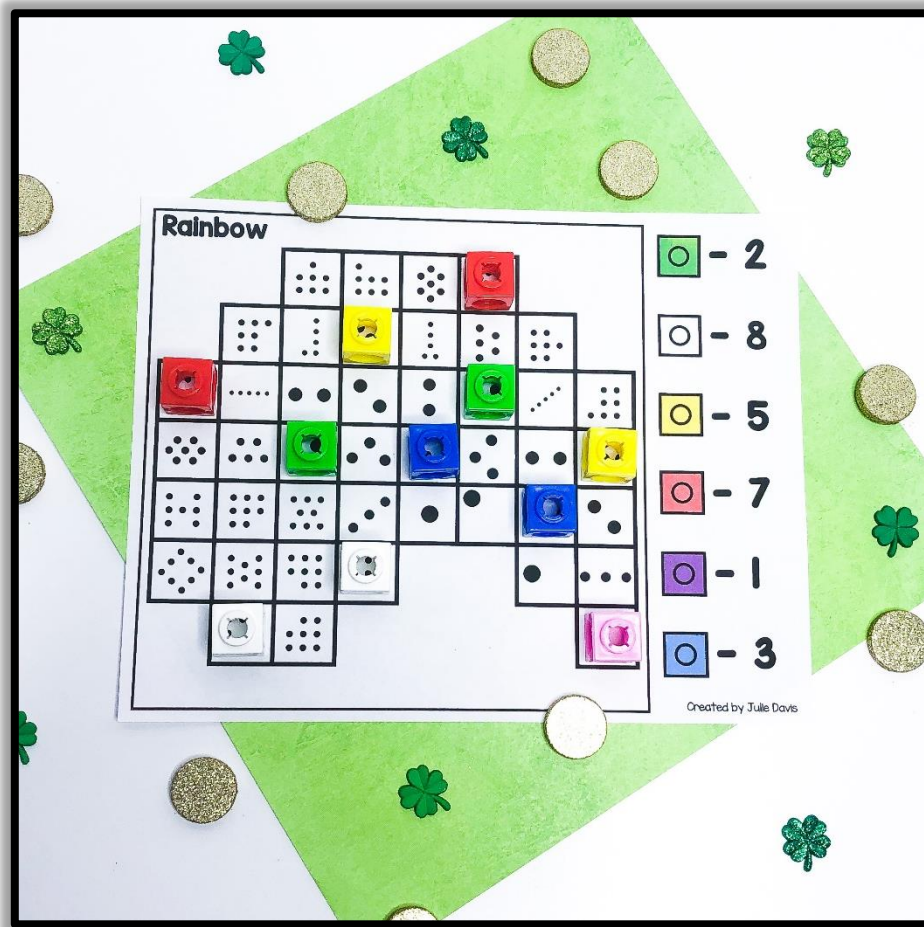

Number Identification

Students will read the code on the side of the mat. Using the color code, determine the number represented by each color and place the matching snap cubes on the correct number on the mat.

Instructions

Subitizing Identification

Students will read the code on the side of the mat. Using the color code, determine the number represented by each color and place the matching snap cubes on the correct dot pattern on the mat.
